

What is a ZERO DEFORESTATION COCOA

Low in **Greenhouse Gas (GHG) Emissions** ?

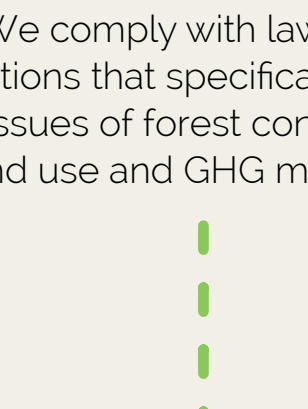

Deforestation free and low GHG cocoa production combines forest care with GHG mitigation practices in cocoa planting, harvesting and processing.

Why are we ZERO DEFORESTATION and low in GHG emissions?

1 We avoid the negative impact on areas to conserve the forest

2 We comply with laws and regulations that specifically regulate the issues of forest conservation, land use and GHG mitigation

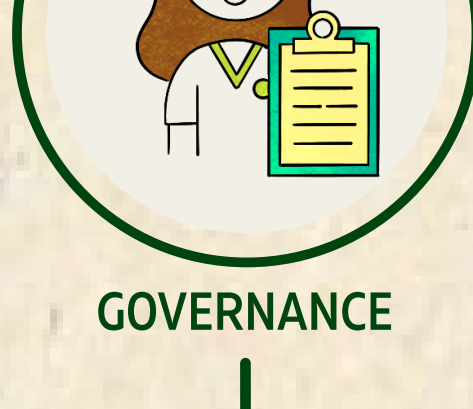

4 We contribute to the restoration of degraded ecosystems

3 We implement sustainable land management practices

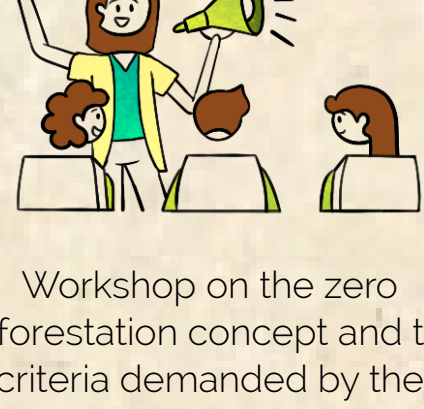

Activities of our Business Model

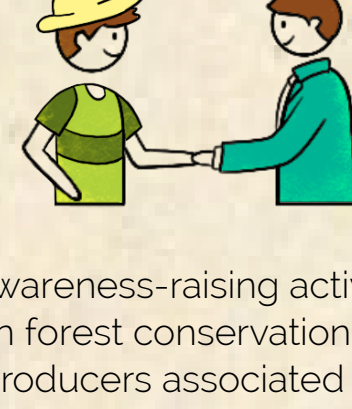

GOVERNANCE

Conceptualization of zero deforestation and low in GHG emissions cocoa

Workshop on the zero deforestation concept and the criteria demanded by the government, buyers, financiers and international standards

Awareness-raising activities on forest conservation with producers associated with the cooperative

PRODUCTION

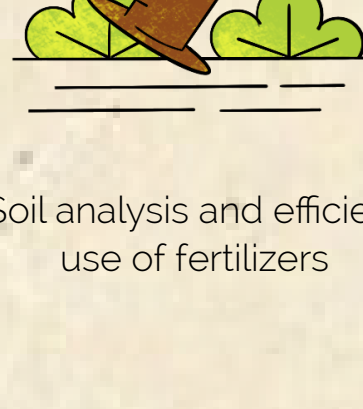

Increased productivity through good agricultural practices low in GHG emissions to avoid the need to extend the agricultural frontier

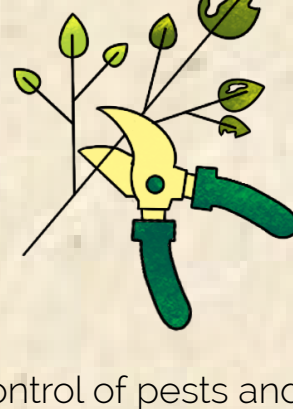

Training in good agricultural practices

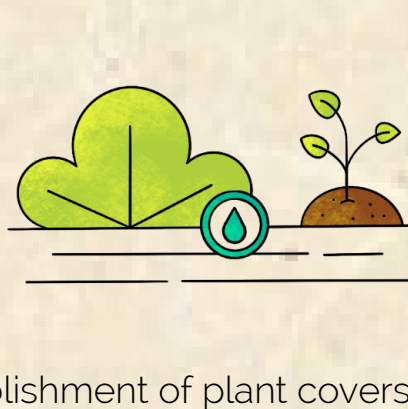

Sustainable land management

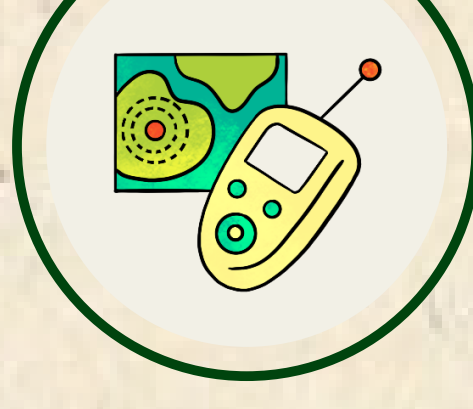

Soil analysis and efficient use of fertilizers

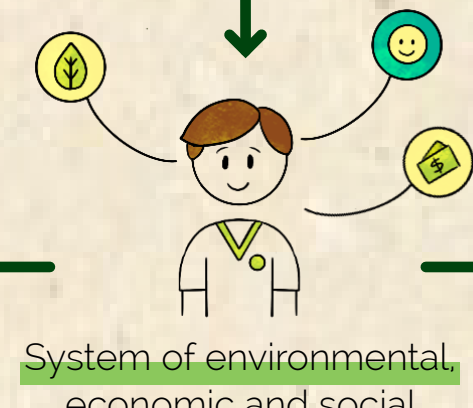

Control of pests and diseases through continuous sanitary pruning

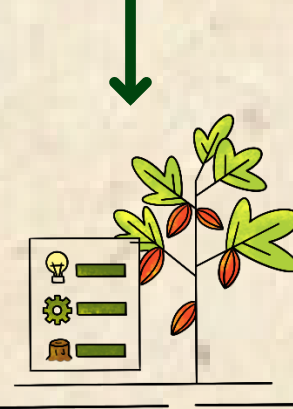

Establishment of plant covers in the soil to improve moisture and maintain its fertility

MONITORING, REPORTING AND VERIFICATION (MRV)

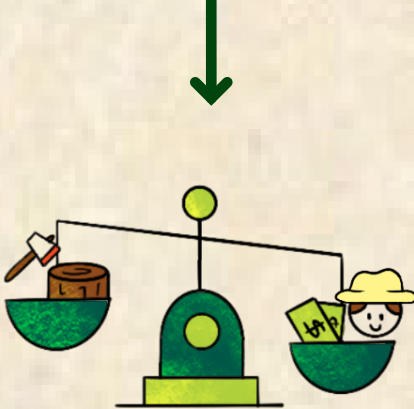

System of environmental, economic and social indicators

GHG emissions due to change of coverage and implementation of agricultural practices with a mitigation approach

Change of forest cover in the area of influence

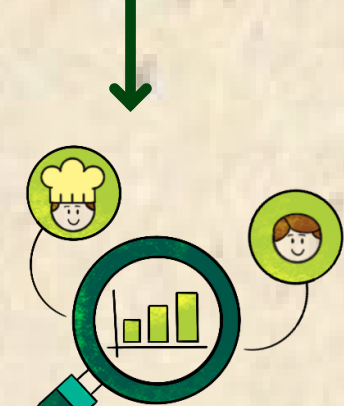

Socio-economic well-being of producers

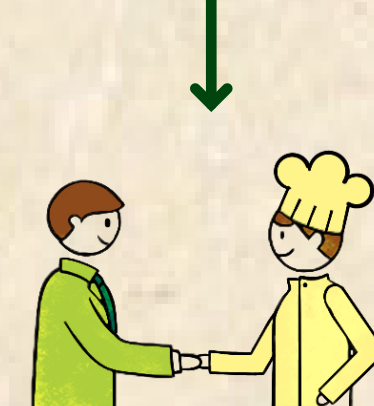

MARKET

Access to differentiated markets that recognize the added value of a Zero Deforestation product

Market research

Approach to identified buyers

BENEFITS OF THE

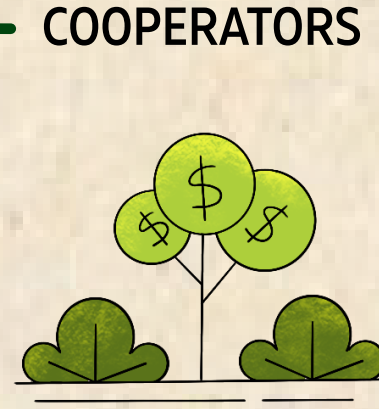

Zero Deforestation and Low GHG Emissions Model for:

PRODUCERS

Improve the quality of life and support in the forest conservation

COOPERATORS

Facilitate access to international green funds

INVESTORS / FINANCIAL INSTITUTIONS

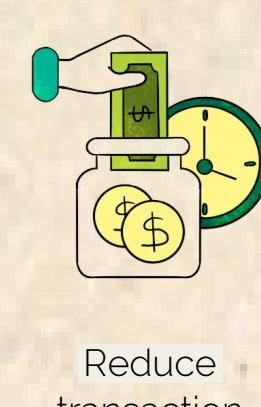

Comply with the environmental commitments assumed

Improve accountability reporting

Plan a better placement of resources for future projects

Reduce transaction costs and risks

BUYERS

Creates and strengthens the relationship with customers and consumers to avoid reputational damage

Optimizes the management of climate risks
